"Just shoot..." says the game.

I made a video with this which, yes, the colour is not correct to that in the game but the video still shows you the game for it's true face and has many relevant major flaws in it like no hitboxes for someone's head and not knowing what you're doing, meant to do and go or why. Just know what sort of "game" you are getting into before you buy.

[From the horrible UI to the level design and bad enemy AI every inch of this game is a mess to the point i'd consider it a scam. It's amazing to see what steam allows to be sold on it nowadays. There's not even animations for you swapping guns or the option to change the volume so headphones users: beware of earrape.](#)

[For 5\\$ it isn't worth it and the game size is 3.2GB for this mess. It's nothing like doom so don't be fooled. If you are interested in this game I recommend just getting doom instead. Why is this tagged for "gore" if it doesn't even have blood?. "Just shoot..." says the game.](#)

Why is this tagged for "gore" if it doesn't even have blood?. i loved the art and concept idea of this game - fps in a real hell enviroment - tho game is totally incomplete, like a homework of some game developer so youll find tons of errors glitches and almost imposible gameplay. Be prepared for some awful gaming expirience, but if you there for a 50 cents tour why not, i loved the art and concept idea of this game - fps in a real hell enviroment - tho game is totally incomplete, like a homework of some game developer so youll find tons of errors glitches and almost imposible gameplay.
